# Victor Kobayashi

Skills

**Languages:** Python, SQL, NodeJS, TypeScript

**Tooling:** Airflow, DBT, Flask, Snowflake, Postgres, React, Pytorch, Git, AWS, Docker

## Experience \_\_\_\_\_

## **Data Engineer** | Super

Aug 2022 - Present

- Reduced hotel mapping run times by over **50%** by automating mapping verification tasks
- Developed a pipeline to automatically update and self host 10M+ hotel images on AWS CloudFront
- Built custom ELTs to automate data extraction from an array of fintech vendors and power the decisioning behind **thousands** of monthly cash advance applications

#### **Data Scientist | Shopify**

Sep - Dec 2021

- Built reports to segment marketing channel GMV by user device types
- Collaborated with product teams to develop dashboards measuring the impact of beta features
- Upgraded data job to ingest from a new payment api while maintaining compatiblity with the legacy api

#### **Machine Learning Engineer** | Zynga

Ian - Apr 202

- Integrated fluent-bit into ML team microservices, enabling efficient event streaming into AWS Kinesis
- Automated microservice deployments to **EKS** development clusters with **Jenkins**
- Developed a dynamic event filter system capable of applying real-time adjustments to filter criteria
- Maintained reinforcement learning pipeline to deliver over 5000 personalized notifications per day

#### **Machine Learning Engineer** | PerkinElmer

May - Aug 2020

- Built a custom data loader for a synthetic data generation model to cut down training time by 37%
- Introduced test driven development to the AI Research Team and built out an automated unit testing suite
- Created image augmentation modules to boost image masking performance in low performing areas

#### **Software Developer** | ROSS Intelligence

Sen - Dec 2019

- Developed sign-up free trials to enable prospective clients to try ROSS while maintaining data privacy
- Created an **AWS Lambda** service to apply event tracking to over **2000** outbound emails per month
- Automated Serverless function deployments with **Travis-CI** to minimize deployment errors

## **Software Engineer | Super**

Jan - Apr 2019

- Improved Lighthouse performance scores by over **400%** by implementing SSR into React components
- Developed an internal tool with **Flask** to facilitate and audit hotel bidding on multiple meta-channels
- Built an internal tool to enable self-serve hotel pricing experimentation for the analytics team

## Projects.

OPTCG.GG Current

- Companion site for the One Piece trading card game with card viewing and pack simulation features
- Integrated Amplitude analytics and built out backend services

Beat ₢ Jan 2018

- Received the **Best UI/UX Hack** award and ranked in the **Top 10** hacks at PennApps Retro
- Designed the UI and contributed to the **Ionic** implementation

## Education

#### **University of Waterloo** | Cheriton School of Computer Science

2017 - 2022

• Bachelors of Computer Science with Distinction
