Victor **Kobayashi**

✉ vkobayas@uwaterloo.ca | ⌂ kobai.github.io | ⬛ Kobai | in vkobay

Skills

Languages: Python, NodeJS, TypeScript, Go, C++, C, Java, Bash, Scheme
Frameworks: PyTorch, Keras, Flask, React, SQL, Git, AWS, Travis-CI, Docker, Kubernetes

Experience

Machine Learning Engineer | Zynga   *Jan - Apr 2021*
- Efficiently streamed event data into **AWS Kinesis** by integrating **fluent-bit** into project microservices
- Provisioned and automated microservice deployments to **EKS** development clusters
- Designed a dynamic event filter to process event data based on real time adjustable filtering criteria
- Maintained and monitored RL pipeline to ensure optimal delivery of over **5000** push notifications per day

Machine Learning Engineer | PerkinElmer   *May - Aug 2020*
- Investigated machine learning pipeline for bottlenecks and cut down training time by **37%**
- Researched **GAN** evaluation metrics and designed a **PCA** based metric to assess synthetic data quality
- Introduced test driven development to the AI Research Team and built out an automated unit testing suite
- Conducted research and proposed the use of **Cramer GANs** for synthetic data generation
- Created an image augmentation module to boost image masking performance in low performing areas

Software Developer | ROSS Intelligence   *Sep - Dec 2019*
- Trained **SpaCy** model to detect citations in legal cases at a higher accuracy than existing models
- Developed sign-up free trials to enable prospective clients to try ROSS while maintaining data privacy
- Built a group discounts feature to encourage solo practitioners to share ROSS with their colleagues
- Created an **AWS Lambda** service to apply event tracking to over **2000** outbound emails per month
- Automated Serverless function deployments with **Travis-CI** to minimize deployment errors

Software Engineer | Snapcommerce   *Jan - Apr 2019*
- Boosted application Lighthouse performance score over **400%** by making UI components SSR compatible
- Developed an interal tool with **Flask** to simplify and audit bidding on multiple meta-channels
- Built an interface with **Flask** and **Redis** to enable hotel pricing adjustments without developer assistance
- Created Google ads landing page variants for A/B testing in **React**
- Modernized the A/B testing dashboard and implemented auto-expiring experiments

Software Developer | TemboSocial   *May - Aug 2018*
- Converted inline email reports into pdf attachments to enable offline accessibility
- Re-designed numerous parts of the platform to improve the user experience with **React**

Projects

Name That Genre   *Dec 2019*
- **Embedding + CNN** model that classifies a song's genre based on the song's lyrics
- Model was developed with **Keras** and achieved **F1 scores** of up to **0.79**

Beat   *Jan 2018*
- Received the **Best UI/UX Hack** award and ranked in the Top 10 hacks at PennApps Retro
- Designed the UI and contributed to the **Ionic** implementation

Education

University of Waterloo | Cheriton School of Computer Science   *(Expected) 2017 - 2022*
- Candidate for a Bachelors of Computer Science
- President's Scholarship of Distinction for entrance average of 95+
- Courses: Operating Systems, Algorithms, Cryptography, Statistics, Object Oriented Programming
